

柔性管箍

最佳的隔音和减振效果

The fully flexible tube clamp

Optimum sound insulation and vibration dampening

主要材料

柔性管箍由热塑橡胶制成。

优点

具有更好的隔音和减振性能。可以非常方便地固定各种敏感性管道设备。这种材料的质量明显高于那些硬化橡胶产品。

结构

内表面平滑或有槽。安全有效的螺栓固定装置保证了最好的连接效果。因此，不可能发生自我松动！焊接板、盖板和螺栓也可以使用不锈钢的。

尺寸符合 DIN 3015 标准范围。

The primary material

The fully flexible tube clamps are made out of thermoplastic caoutchouc.

The advantages

Decisive improvements regarding noise insulation and vibration behaviour. Easy securing also of sensitive tube and pipe installations. The essential qualities of this material are appreciably higher than those of comparable vulcanized rubber products.

The constructions details

The internal surface are smooth or grooved. A useful screw safety-device guarantees perfect connections also for the solid rubber construction – therefore making a self-acting loosening impossible! The welding plates, covers and screws are also available in stainless steel.

Measurement please order at the standard range DIN 3015.

低噪音和低振动

Low noise and vibration level

不受天气的影响
不易破碎

Weather-proof and brittle-resistant

弹性高，外形稳定

Shape stability with high elasticity

可以抵抗化学品的
侵蚀

Resistant against many chemicals

宽广的温度范围

Wide temperature deployment area
